WORK EXPERIENCE

Prolifics

February 2023 – July 2024

Associate Data Engineer | June 2023 – July 2024

Hyderabad, India

- Designed and deployed a TensorFlow-based sprint risk prediction service as a Flask REST API, giving 15+ engineering managers 1–2 weeks' advance visibility into at-risk sprints.
- Unified 250K+ JIRA and QA execution records through scalable SQL ETL pipelines, creating the trusted dataset that powered both predictive modeling and engineering analytics.
- Drove adoption across 200+ developers by integrating predictions into engineering dashboards, backed by documentation and onboarding across delivery teams.

Data Engineer Intern | February 2023 – May 2023

- Engineered SQL ETL pipelines that consolidated 100K+ JIRA and PostgreSQL engineering records into reusable analytics datasets, establishing the data foundation for delivery analytics.
- Standardized engineering KPIs for sprint health, defect trends, and delivery performance, creating a shared reporting framework across QA and delivery teams.
- Validated engineering datasets by identifying data quality issues across QA and project systems, improving the reliability of downstream analytics and reporting.

HeiDigi

March 2022 – August 2022

Data Analyst Intern

Hyderabad, India

- Built campaign measurement across 20+ marketing campaigns, defining KPI frameworks and automating recurring client reporting through reusable Python and SQL pipelines.
- Ran experimentation workflows and statistical analyses that identified high-performing audiences and creatives, driving 20% higher ROI and 18% higher CTR.

PROJECTS

Merchant Credit Risk (github.com/harthikrm/merchant-credit-risk-fraud-monitoring)

December 2025

- Credit risk monitoring platform detecting high-risk merchant behavior and fraud patterns in real-time transaction streams — 400K+ transactions across 1,200 merchants, 0.44 PR-AUC. (SQL, Python, Tableau)

Customer Churn Analysis (github.com/harthikrm/churn-analytics)

September 2025

- Predictive retention system using ensemble models (XGBoost) to identify high-risk accounts and trigger proactive intervention 90% accuracy, isolating 65% of churn into identifiable high-risk cohorts. (Python, Scikit-learn)

Retail Sales Forecasting

August 2025

- Multi-store sales forecasting system using seasonal decomposition and MASE-optimized regression models — +18% accuracy lift across 3 seasonal patterns and 2 pricing segments. (Python, Scikit-learn, Statsmodels)

EDUCATION

University of Texas at Dallas, Richardson, TX

May 2026

Master of Science in Business Analytics and Artificial Intelligence - Scholar With Distinction

GPA: 3.8/4.0

GITAM University, Hyderabad, India

April 2024

Bachelor of Technology in Computer Science and Business Systems

GPA: 3.7/4.0

SKILLS & INTERESTS

- **Machine Learning & AI:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, LangChain, LangGraph, OpenAI
- **Analytics & BI:** A/B Testing, KPI Reporting, Power BI, Tableau, Pandas, ETL, Data Modeling
- **Languages & Databases:** Python, SQL, R, JavaScript, TypeScript, PostgreSQL, MySQL, pgvector, DuckDB
- **Cloud & Backend:** GCP (Cloud Run, Vertex AI, Cloud SQL), Docker, FastAPI, Flask, Git, GitHub Actions
- **Interests:** Golf, Fishing, Camping, Traveling, Cooking, Cricket, Soccer, Formula 1
