PROFESSIONAL SUMMARY

Data Analyst and May 2026 MSBA graduate with hands-on experience collecting, cleaning, and analyzing large datasets to identify trends and drive business decisions. Built recruiting funnel analytics covering 26K records with Power BI dashboards, 30+ DAX measures, SLA monitoring, and data quality validation. Previously built a production ML and reporting system at Prolifics used by 200 developers daily, still running in 2025. Proficient in Python, SQL, Power BI, Tableau, Excel, and statistical analysis.

EDUCATION

The University of Texas at Dallas, Richardson, Texas

Master of Science in Business Analytics and Artificial Intelligence – Scholar With Distinction

May 2026

GPA 3.81

GITAM University, Hyderabad, India

Bachelor of Technology in Computer Science and Business Systems

April 2024

GPA 3.73

PROFESSIONAL EXPERIENCE

Prolifics – Data & Analytics Intern | Hyderabad, India

Feb 2023 – Jan 2024

- Collected, cleaned, and validated 100K+ PostgreSQL records using Python and SQL; identified data quality issues and implemented corrective solutions improving downstream reporting accuracy by 25%.
- Developed and maintained weekly KPI dashboards in Power BI tracking operational throughput and SLA performance; automated ETL workflows processing 50K+ rows/day reducing reporting cycle time by 40%.
- Partnered with cross-functional stakeholders across DevOps, QA, and Finance to understand data needs and deliver analytical solutions; documented data sources and metric definitions enabling non-technical teams to interpret reporting outputs independently.

HeiDigi – Digital Marketing Analyst Intern | Hyderabad, India

Mar 2022 – Aug 2022

- Analyzed Google Ads campaign datasets using SQL to identify trends and underperforming segments; developed automated Tableau dashboards surfacing KPIs for leadership improving ROI by 20% and CTR by 18%.
- Designed and executed A/B tests applying hypothesis testing and statistical inference; presented findings to CEO-level stakeholders driving 15% revenue impact increase.

PROJECTS

Recruiting & People Systems Analytics | SQL, PostgreSQL, PowerBI, DAX

Jan 2026

- Collected and analyzed 26K ATS records across 6 tables; applied statistical analysis identifying 79.3% mid-funnel drop-off, 39% SLA breach rate, and quarterly time-to-hire trends averaging 49.5 days; presented findings with documented recommendations for stakeholder delivery.
- Built 30+ DAX measures enabling real-time funnel monitoring across monthly application volume, seasonal hiring patterns, and 30-day rolling offer acceptance rate (75%); automated data quality validation detecting duplicates, null IDs, and stage-order violations before stakeholder delivery.

Smart Home IoT Analytics | Python, SQL, IsolationForest, XGB, scikit-learn, PowerBI

Dec 2025

- Collected, cleaned, and analyzed 830K IoT sensor records across 5K households; engineered 8 SQL validation queries using CTEs, window functions, and rolling aggregates ensuring data accuracy and integrity across all analytical outputs.
- Executed A/B test achieving 32.1% reduction in connection drops ($p < 0.001$) projecting \$10,512/year in business impact; built 2 Power BI dashboards with 14 visualizations enabling stakeholder monitoring without analyst support.

Quant Risk Desk | Python, SQL, dbt, Apache Airflow, PostgreSQL, Docker, Tableau

April 2026

- Built automated data pipeline via 9-task Airflow DAG ingesting 21K+ daily records; implemented 18 dbt data quality tests with zero violations and 3-layer transformation computing rolling financial metrics across 11 S&P 500 sector ETFs.
- Delivered Tableau dashboard with sector KPI scorecards, trend analysis, VaR envelopes, drawdown charts, and correlation heatmaps; identified diversification collapse from 0.47 to 0.88 correlation during March 2020 COVID crash enabling data-driven portfolio insights.

SKILLS

Programming and Databases: Python (Pandas, NumPy, scikit-learn, XGBoost, matplotlib, seaborn, Plotly), SQL (CTEs, Window Functions, Joins, Query Optimization), R, PostgreSQL, MySQL, DuckDB, Git/GitHub, Jupyter Notebooks

Analytics and Visualization: Tableau, Power BI (DAX, Data Modeling, KPI Engineering), Excel (PivotTables, VLOOKUP, INDEX-MATCH, Advanced Functions), Data Storytelling, Executive Presentations, Self-Service Dashboard Design

Data Engineering and ETL: Apache Airflow, dbt (Staging/Intermediate/Marts, custom tests), ETL Pipeline Automation, Data Validation and Quality Testing, Dimensional Modeling, Star Schema Design, Data Documentation

Statistical Methods: Regression Analysis, A/B Testing, Hypothesis Testing, Statistical Inference, Anomaly Detection, Time-Series Forecasting (ARIMA, Prophet), Descriptive Statistics, Confidence Intervals

Cloud and Tools: GCP (familiar), AWS (familiar), Docker, GitHub Actions, n8n, Google Analytics

ACTIVITIES

Cloud Analytics Lead – GDSC, GITAM Hyderabad

Apr 2022 – Apr 2024

- Built GCP and BigQuery pipelines analyzing behavioral data to quantify investment impact on college admission rates.
