PROFESSIONAL SUMMARY

People Analytics professional and May 2026 MSBA graduate with hands-on experience owning end-to-end analytical projects across the employee lifecycle. Built recruiting funnel analytics covering 26K records with Power BI dashboards, DAX measures, SLA monitoring, and data quality validation. Previously built a production ML and reporting system at Prolifics tracking operational KPIs for cross-functional teams, still running in 2025. Proficient in Python, SQL, R, Power BI, Tableau, and statistical modeling.

EDUCATION

The University of Texas at Dallas, Richardson, Texas

Master of Science in Business Analytics and Artificial Intelligence – Scholar With Distinction

May 2026

GPA 3.81

GITAM University, Hyderabad, India

April 2024

Bachelor of Technology in Computer Science and Business Systems

GPA 3.73

PROFESSIONAL EXPERIENCE

Prolifics – Data & Analytics Intern | Hyderabad, India

Feb 2023 – Jan 2024

- Partnered with Finance, DevOps, and QA teams to define analytical requirements and translate business questions into deliverables; built and maintained Power BI dashboards tracking employee and operational KPIs, reducing reporting cycle time by 40% and improving accuracy by 25%.
- Owned end-to-end analytical process across 100K+ PostgreSQL records: applied multivariate statistical modeling, identified upstream data quality gaps, implemented corrective SQL pipelines, and documented metric definitions enabling non-technical stakeholders to interpret outputs independently.

HeiDigi – Digital Marketing Analyst Intern | Hyderabad, India

Mar 2022 – Aug 2022

- Designed and executed A/B tests applying hypothesis testing and statistical inference; translated findings to CEO-level stakeholders contributing to 15% revenue impact increase.

PROJECTS

Recruiting & People Systems Analytics | SQL, PostgreSQL, PowerBI, DAX

Jan 2026

- Architected star schema data model across 6 ATS tables covering 26K records; applied statistical analysis identifying 79.3% mid-funnel drop-off, 39% SLA breach rate, and quarterly time-to-hire trends averaging 49.5 days; documented actionable people strategy recommendations for stakeholder delivery.
- Built 30+ DAX measures enabling real-time funnel monitoring across monthly application volume, seasonal hiring patterns, and 30-day rolling offer acceptance rate (75%); translated HR business questions into concrete data-driven insights across the full employee lifecycle.

ATS Data Integrity & SLA Monitoring Framework | SQL, PostgreSQL, PowerBI

Jan 2026

- Designed event-log people analytics data model covering 10K candidates, 12.5K applications, and 30K+ stage events; engineered SLA transition monitoring across Applied-to-Screen, Onsite, and Offer latency thresholds with data privacy principles applicable to real employee lifecycle data.
- Built data quality validation suite detecting duplicates, null IDs, orphan events, and stage-order violations across 30K+ records; surfaced 3% anomaly rate and reconciled discrepancies across all downstream reporting layers.

Smart Home IoT Analytics | Python, SQL, IsolationForest, XGB, scikit-learn, PowerBI

Dec 2025

- Executed A/B test achieving 32.1% reduction in connection drops ($p < 0.001$) projecting \$10,512/year in business impact; built 2 Power BI dashboards with 14 visualizations enabling stakeholder monitoring without analyst support.
- Applied IsolationForest anomaly detection achieving 11.95x churn lift and XGBoost classifier (ROC-AUC 0.9618) across 830K IoT records and 5K households; engineered 8 SQL validation queries using CTEs, window functions, and rolling aggregates ensuring data integrity across all analytical outputs.

SKILLS

People Analytics: Employee Lifecycle Analytics, Recruiting Funnel Analysis, ATS Lifecycle Modeling, SLA Monitoring, Time-to-Hire Analytics, Offer Acceptance Rate Modeling, Headcount and Hiring Trends, Data Privacy Principles

Programming and Statistical Tools: Python (Pandas, NumPy, scikit-learn, XGBoost, SHAP, SciPy, matplotlib, seaborn), R (statistical modeling, econometrics, multivariate analysis), SQL (CTEs, Window Functions, Aggregations, Query Optimization), Git/GitHub

Statistical Methods: Multivariate Modeling, Regression Analysis, Hypothesis Testing (t-test, Mann-Whitney U), A/B Testing, Statistical Inference, Confidence Intervals, Anomaly Detection, Time-Series Forecasting (ARIMA, Prophet)

BI and Visualization: Power BI (DAX, Data Modeling, KPI Engineering), Tableau, Plotly, Excel (PivotTables, Advanced Functions, Forecasting), Self-Service Dashboard Design, Data Storytelling, Executive Presentations

Data Engineering: PostgreSQL, DuckDB, dbt, Apache Airflow, ETL Pipeline Automation, Star Schema Design, Data Validation and Quality Testing, Data Documentation

ACTIVITIES

Cloud Analytics Lead – GDSC, GITAM Hyderabad

Apr 2022 – Apr 2024

- Led cloud analytics initiatives using GCP and BigQuery, building pipelines analyzing student behavioral data to surface people strategy insights for college leadership.
